3. DISCUSSION:

A time and materials contract will be adaptable to whatever level of effort is required in support of the performance study program by [redacted] Stimulus organization, administration or NPIC testing, and collateral material collection will be typical tasks performed by [redacted] personnel. Cost-effectiveness will be promoted by such an arrangement by limiting the number of transcontinental trips required of [redacted] personnel and by reducing the number of higher salaried man-hours devoted to the overall program.

4. CONCLUSIONS:

Because of [redacted] intimate familiarity with the Center and previous successful working relationships with [redacted] on NPIC projects, employment on the new P.I. Performance Studies is considered both appropriate and extremely desirable.
